MICHELLE LUJAN GRISHAM
GOVERNOR

KATE M. O'NEILL, ED.D.
CABINET SECRETARY

New Mexico Curriculum and Articulation Committee June 13-14, 2019 Decision Summary

Questions regarding common course numbering:

Common Course Numbering Questions

1. Because the Women's Studies prefix is **GNDR** should we change the title to Gender Studies (CNM, NMHU, NMSU, UNM, WNMU)?

Vote: 2 yes, 2 no

No input from UNM.

GNDR will remain Women's Studies.

2. Proposed change to Course Description to course offered by **CNM** (HSV 2205) and **UNMG** (HS200):

Prefix	HMSV
Number	2215
Name	Adolescent Substance Abuse: Prevention and Treatment

Current Course Description

This course meets the criteria for education hours toward the Licensed Substance Abuse Associate – the entry level license in New Mexico to become an independent addiction counselor. In this course we will evaluate the impact of risk and protective factors in the prevention and treatment of adolescent substance use. Discover the differences between adolescent and adult substance use/abuse and evidence-based approaches for prevention and treatment. Assess the different external and internal factors that may contribute to alcohol and drug use during adolescence and young adulthood.

Proposed Course Description

In this course we will evaluate the impact of risk and protective factors in the prevention and treatment of adolescent substance use. Discover the differences between adolescent and adult substance use/abuse and evidence-based approaches for prevention and treatment. Assess the different external and internal factors that may contribute to alcohol and drug use during adolescence and young adulthood.

No input from UNM.

The HMSV 2215 course description will remain the same.

351	NMSU	MATH 1220. College Algebra	Mathematics	Narratives are focused on the course-specific SLOs instead of the essential skills and their related components. Instead, narratives should describe what activities students do to develop the essential skills throughout the course. Communications narrative reads more like critical thinking. This set of math courses does not show that the course has been modified to develop the essential skills.	Review
352	NMSU	MATH 1430. Applications of Calculus I	Mathematics	Narrative does not adequately address all of the component skills in communication. 362	NMSU	PHYS 1115C. Survey of Physics with Lab	Science	Personal and social responsibility component skills are not sufficiently addressed. Merely partnering students with a culturally different partner, without any analysis or assessment of intercultural reasoning and competence is also not sufficient, nor is it necessarily possible. The Personal and Social Responsibility narrative is misleading as it leads with "to develop quantitative reasoning skills". Aside from this copy and paste error, there could be more of a description of what students will do, and how intercultural competence will be assessed. In the	Review

407	NMSU	PHYS 1125. The Physics of Music	Science	How are the skills for Personal and Social Responsibility going to be assessed? Narratives read more like learning outcomes, rather than a discussion of how the students are learning or being evaluated. Assessment is vague on how it measures and implements the essential skills. Under Personal & Social Responsibility, merely making assignments to give them a 'chance' to acquire a skill does not assure that it will happen. How the actual acquisition of the relevant skills be measured should be discussed.	Review

Dance Appreciation	Creative & Fine Arts	Communication area does not address all the components and the attached assignment doesn't show how students will meet the essential skill in the course. The narratives were too brief to provide an explanation of what students will do throughout the term to gain all the related component skills.	Review
424	NNMC	HUMN 1120. The Search for Meaning	Humanities	The Critical Thinking narrative does not specifically address the required components. Not enough information is given to determine if the requirements are met. Narratives should focus on what students do to develop the essential skills.	Review

443	NNMC	PSYC 2120. Developmental Psychology	Social & Behavioral Sciences	Narratives should describe what activities students do to develop the essential skills throughout the course. Critical thinking contained too many instances of phrases that did not explain how the student would practice the component skills, e.g. "Students learn how", "they can distinguish", "students also learn".	Review

446	LCC	BIOL 2110/2110L. Principles of Biology: Cellular/Lab	Science	Narratives should describe what activities students do to develop the essential skills throughout the course. Critical thinking - listing the steps of the scientific method does not illustrate how students will develop critical thinking. Quantitative reasoning - doesn't just "happen" during the lab. Personal & Social Responsibility - not addressed except for sustainability and the natural worlds. Included assessment is not related to any of the essential skills.	Review

				components. Critical Thinking - research mentioned, but not problem setting, evidence evaluation, reasoning/conclusion. Personal & Social Responsibility narrative doesn't discuss the component skills.	
483	LCC	SOCI 1110. Introduction to Sociology	Social & Behavioral Sciences	Critical thinking area is weak and Personal/Social needs more specific assignments used to measure. Narratives should describe what activities students do to develop the essential skills throughout the course. Narratives say that "class is designed to make students..." not what students will be doing to demonstrate the essential skills. Communication - only oral and written mediums discussed. No strategies for understanding and evaluating messages, or evaluation and production of arguments. Just clear and coherent writing. Critical thinking - Problem setting, evidence evaluation, reasoning/conclusion not met. Personal & Social Responsibility - 1 component met.	Review
484	LCC	POLS 1120. American National Government	Social & Behavioral Sciences	Narratives are very general. Personal and social responsibility components are not specifically addressed to explain how students develop the essential skills. Application instructions for the General Education narratives will be modified:

1. Word limit will be removed and replaced with the following statement regarding narratives: "concise while addressing all of the required skill components."
2. The statement "By the end of this course, students will be able to..." will be added to the top of each narrative box.
3. Instructions for narratives will also include the statement: "The narratives should address what students will do in the course throughout the semester to develop the essential skills and how those skills will be assessed. The narratives should not address how the discipline fits into General Education."
